A) In response to the question 2 in the inspectors letter of 9 Sept.2020.

I do not feel the the figures issued for the household projections based on 2018 when compared to the figures supplied by BDC to the inspector as covered in his letter of 27 June 2018, constitute a meaningful change.

B) None, I believe that the number of 716 is the minimum number that should be used. BDC have under supplied the demand for several years and already have a significant shortfall since the start of this planning period. It is felt that due to this under supply of housing has driven the myth that there was/is low demand in the area, which is totally untrue, and it is the aforementioned that drove this unrealistic figure issued in 2018 by the Government. In fact the local Council has created a self fulfilling prophecy.

Thank for the opportunity to opine.

John
